# **TWITTER BRIEF**

I would like you to build up a list of Twitter followers that I can "friend" and advertise to.

Before you start, you will need the following - a <u>twitter</u> account (free), a <u>re-follow.com</u> account (free), <u>google chrome</u> browser & the "<u>Copy All URLs</u>" extension for Google Chrome.

Then...

#### **STEP 1**

Visit re-follow.com and click on home, then your accountname. Now click on "create new campaign":

Week Month		This Week:	0 followers	This Month: 0 followe
Campaign	Filters	Followed Today	Total Follow	ed Follow Ba

Following @jvzoo, affbuzz	~	0	0	(
Following @jvzoo	-	0	0	(
Following @allrounda	~	0	0	(
+ Create New Campaign				Fa

This will load up a new campaign which basically allows you to apply filters.

		Save Settings		

1 This is the user account, eg "pepsi". You should only enter 1 account at a time.

2 You should click on "show more options" on the right, then a new area will appeaar. Type in keywords and choose "in Bio" in the dropdown.

3 set following count as 0 to 5k

- 4 uncheck the "following me" checkbox
- 5 ensure "have picture" is checked
- 6 click "create campaign" or "save settings"

You may also want to click to create new filter and save the filter, so you can easily edit it again in the future:

### STEP 2

This will now load all users who match that criteria. By default it only shows 25 users (10 per page).

We need to do the following exactly to save these users:

Use	rs following @allrounda		Process	ed: <b>3,998</b>	Matched: 25	Followed: 0	Ignored: 130	¢
Keyboar	d shortcuts: follow(f), (gnore(l)		Followers	Following	Influence	Last Tweet 🔻	<< Prev	Next

	Open link in incognito window Save link as Copy link address	500 @ewcti "	306	292	1.0	ЗM		
	Save image as Copy image URL Copy image Open image in new tab	M, GifTEd,	120	310	0.4	ЗM		

1 Processed: how many people have been searched by the "refollow" software. This number will increase until the "matched" number hits 25. At that point the tool will stop searching.

2 For each result right click on the twitter user to open the twitter page (eg https://twitter.com/FaisalShah\_) in a new tab.

3 Now click the "x" button to remove this user.

NOTE: Please add and instantly remove that same user. Do not open multiple tabs of users, then go back and try to remove those users. Add a user, then instantly remove the same user.

### **STEP 3**

Now simply repeat this process until you have maybe 10-20 tabs open. Remember to right click and open each user in a new tab (1), then instantly close that tab to remove the user (2):

	Refolik × 💓 In And	× Y ltz low.com/h	ues x V y In Anc x V y Majd ( x V y Jerry S x V y nome	Jacyn 🗙 🌱 Cł	aoti x PSYCH	x y J. Alex x	y Adrie: × * 1	RAYch × RE R	foli x Chris -

		1	©Kirenjunior (Kiren D Kickers) Music composer, Singer, Music Teacher To Be. #COC player, "And my chair was stolen from my room"	260	6 463	0.6	2D	Follow	2

3 After a while, you will have 10-20 tabs open. You are now ready to copy the first batch of users.

4 To do this, click on the "copyalllinks" umbrella icon and click "copy"

5 This will now save all the URLs (in this case 13).

## **STEP 4**

Now paste all these URLs to a notepad file (1) and save.

2 re-follow.com/home will be open so you will need to delete that. We only want twitter.com/ links.

#### STEP 5

You should keep on doing this basically:

/ Kefollow - '	x Solway (C x Solw	Andy De il X	💅 Edward Fcil	× V Clyde Peri	🗙 💓 Ext. Tre Am	X Beedie B	(( × ))	000	- 0	۲ <u>.</u>

Now you need to remove all the tabs (close tabs to right)

=	Close tab Close other tabs	Ctrl+W			3	
	Close tabs to the right	1	allrounda		Processed: 4,497	Matche

1 Close all tabs apart from the "refollow" page - right click on the tab (page) you are currently on and choose "close tabs to the right"

2 This will close all the twitter tabs so we can continue our search.

3 You should continue this process until the processed number is the same (or at least very near to), the "followers" number of the page.

So this page is allrounda which has around 19,600 followers:

1 So keep on doing it until the "processed" number hits the total as shown here:

Users following @allrounda	Proces	Processed: 19.6K Ma		Matched: 1 Followed: 0		٥	
Keyboard shortcuts: follow(f), ignore(i)	Followers	Following	Influence	Last Tweet 🔻	<< prev	Next >>	
ODPESTBEATZ (BrownsvilleProd.) #nowplaying @SoundClick: About That Paper   BVP/HB   FREE	155	365	0.4		Follow	X	

You can see we have "ignored" 315 users (so we should have 315 usernames in our twitter account).

2 you should see this message when the job is done

3 when we close the final user we should then export all the tabs again.

Then we would stop this page, save the text file as "page-keywords.txt" and start the next campaign.
